MOL GROUP AT A GLANCE

MOL Group is one of Central Europe's leading international oil and gas companies with operations in 40 countries in Europe, the Middle East, North Africa and CIS member countries. MOL Group has enjoyed more than 7 decades of oil and gas industry experience in the CEE region and has a proven international track record of over 20 years. Its Upstream Division has a diverse portfolio with oil and gas exploration activities in 11 countries and valuable production assets in 7 countries - worldwide. Its Downstream Division operates 5 world-class refineries and 2 petrochemicals units, in Hungary, Slovakia, Croatia and Italy. MOL Group also operates a network of over 1,700 filling stations in 11 countries in Central & Southeast Europe under 8 brands.

MOL LUBRICANTS OVER A CENTURY OF QUALITY

The history of MOL Lubricants dates back to 1907, when the Vacuum Oil Company's lubricants factory began production in Almásfüzitő, Hungary. The century that has passed since then transformed the company into what it is today - MOL-LUB Ltd., member of MOL Group. More than one hundred years' experience, a first rate technological background and valuable expertise have together contributed to the company's continuously growing range of lubricants and chemicals and established the basis for regional expansion.

ONE OF THE KEY PLAYERS IN LUBRICANTS MANUFACTURING IN THE CEE REGION

Today, MOL Lubricants is one of the key players in lubricants production in the Central and Eastern European region and the leading marketer and distributor of quality branded automotive and industrial products and services in Hungary, Slovakia and Croatia.

MOL Lubricants is present in more than 40 countries with over 600 products and several world-class services. Distribution focuses on the Central & Eastern European region, in particular the Hungarian, Slovakian, Czech, Romanian, Croatian and Bosnian-Herzegovinian markets. The company also exports to numerous other markets across the region and to overseas countries as far away as Taiwan, the Cook Islands and China. Following integration of the Slovakian national oil company, Slovnaft, into MOL Group, Slovakian lubricant production was transferred to the Almásfüzitő factory. Focused production and successful exploitation of synergies have placed MOL Lubricants at the top of the Hungarian, Slovakian and the Croatian markets. In addition to its core markets, the company is also present on important markets such as Russia, Ukraine, Italy and Serbia.

MOL LUBRICANTS IN THE CEE REGION

A FULL-SERVICE LUBRICANT COMPANY

MOL Lubricants offers leading-edge quality products and premium lubrication services. Its comprehensive range of products includes automotive and industrial lubricants, lubricating greases, metalworking fluids, auto chemicals, AdBlue, additives and other specialised products. The portfolio fully meets the latest ACEA and API requirements and is approved by leading automotive and machine manufacturing companies such as, Volkswagen Group, Mercedes-Benz, Volvo, Renault, MAN, Scania, Siemens, Bosch-Rexroth, Alstom and Flender. Lubricant production, a wide range of value-added services and more than 100 years of application know-how together form the complete package MOL Lubricants offers. The range of services covers the whole spectrum of customer lubrication requirements. Users receive world-class services, be it tailor-made lubricant development, high-level training or consulting, on-site lubricants maintenance, lubrication audits or oil and machine diagnostics carried out at its own laboratory, a member of the Wearcheck International network. The company also provides private label and toll blending services.

INNOVATION AND TECHNICAL EXCELLENCE

MOL Lubricants' expertise in Research & Development and its customer-oriented approach continually bring innovative new products to the marketplace to meet its customers' quality and performance needs and to face lubrication challenges in today's competitive marketplace.

The company's highly experienced product development and technical services engineers continuously track the activities of the leading vehicle and industrial equipment manufacturers to ensure that the lubricants they develop meet the latest requirements. By being in day-to-day contact with the world's leading companies in the lubricants and chemicals businesses, they receive the latest technological information, first-hand. Moreover, working with state-of-the-art and innovative equipment at the company's own laboratory permits its engineers to apply the most up-to-date research & development technologies.
