

Tisza Chemical Group Public Limited Company and Subsidiaries

Consolidated financial statements prepared in accordance with
International Financial Reporting Standards together with the independent
auditors' report

31 December 2010

This is a translation of the Hungarian Report

Independent Auditors' Report

To the Shareholders of Tisza Chemical Group Public Limited Company

1.) We have audited the accompanying 2010 consolidated annual financial statements of Tisza Chemical Group Public Limited Company ("the Company"), which comprises the consolidated balance sheet as at 31 December 2010 - showing a balance sheet total of HUF 210,672 million and a loss for the year of HUF 1,170 million -, the related consolidated income statement, consolidated statement of comprehensive income for the year then ended, consolidated statement of changes in equity, consolidated statement of cash flows for the year then ended and the summary of significant accounting policies and other explanatory notes.

2.) We issued an unqualified opinion on the Company's consolidated annual financial statements prepared in accordance with the International Financial Reporting Standards as adopted by EU as at 31 December 2009 on 11 March 2010.

Management's Responsibility for the Consolidated Financial Statements

3.) Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the International Financial Reporting Standards as adopted by EU. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

4.) Our responsibility is to express an opinion on these consolidated financial statements based on the audit and to assess whether the consolidated business report is consistent with the consolidated financial statements. We conducted our audit in accordance with Hungarian National and International Auditing Standards and with applicable laws and regulations in Hungary. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

5.) An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our work regarding the consolidated business report is restricted to assessing whether the consolidated business report is consistent with the consolidated financial statements and does not include reviewing other information originated from non-audited financial records.

6.) We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

6.) We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

7.) We have audited the elements of and disclosures in the consolidated annual financial statements, along with underlying records and supporting documentation, of Tisza Chemical Group Public Limited Company in accordance with Hungarian National and International Auditing Standards and have gained sufficient and appropriate evidence that the consolidated annual financial statements have been prepared in accordance with the International Financial Reporting Standards as adopted by EU. In our opinion the consolidated annual financial statements give a true and fair view of the equity and financial position of Tisza Chemical Group Public Limited Company as at 31 December 2010 and of the results of its operations for the year then ended. The consolidated business report corresponds to the disclosures in the consolidated financial statements.

8.) Without qualifying our opinion we draw the attention to Note 28 to the consolidated financial statements that describe the environmental aspects of the Company's operations and highlights the risk of additional significant decontamination expenses that might incur over the current amount of the provision in relation to past environmental damage as may be identified by future environmental surveys.

1. Presentation of The Group Structure

Background to the consolidated companies

TVK Plc.

Tiszavidéki Vegyi Kombinát, TVK's legal predecessor was founded in 1953. In 1961 it was transformed into a state-owned company called Tiszai Vegyi Kombinát (the "state-owned company"). Prior to its privatisation, the state-owned company was incorporated as a public limited liability company on 31 December 1991 (the "Company"). In accordance with the law on the transformation of unincorporated state-owned enterprises, the assets and liabilities of TVK were revalued as at that date.

As at 31 December 1995, the Company was 99.92% owned by the Hungarian State Privatisation and Holding Company ("ÁPV Rt.") and the remaining 0.08% was owned by local municipalities.

In 1996, the Company was privatised through an offering of shares owned by ÁPV Rt. to foreign and domestic institutional and private investors.

Following this privatisation, shares of the Company were listed on the Budapest Stock Exchange and Global Depository Receipts ("GDRs") representing the shares were listed on the London Stock Exchange. As of 31 December 2010, MOL Plc. holds the majority of the shares.

The Company, with its registered seat in Tiszaújváros (H-3581 Tiszaújváros, TVK-lpartelep TVK Központi Irodaház 2119/3. hrsz. 136. épület), produces chemical raw materials including ethylene, propylene and polymers of these products for both domestic and foreign markets.

The Group had 1,140 and 1,167 employees as at 31 December 2010 and 2009, respectively.

Consolidated subsidiaries

Company name	Country	Range of activity	Ownership 31 Dec 2010	Ownership 31 Dec 2009	Consolidation Method 31 Dec 2010

TVK Ukraina tov	Ukraine	Wholesale and retail trade	100%	100%	Full consolidation
Tisza WTP Kft.***	Hungary	Feed water and raw water	0%	0%	Full consolidation

* Dissolution started on 1 July, 2009

** The ownership of TVK Plc. is 26%. Based on the syndicated agreement TVK Plc. fully consolidated it - as a special purpose entity - in 2010 and 2009.

*** Tisza-Wtp Kft. was formed in 2002 specifically for providing feed water and raw water to TVK Plc. and TVK Erőmű Kft. under a long-term co-operation agreement. Tisza WTP Kft. has been consolidated by the Company since 1 January 2006 in accordance with SIC 12. According to service agreement Tisza WTP Kft. provides services that is consistent with the Group's ongoing major operations and TVK Group is the exclusive purchaser of services provided by Tisza WTP.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

2. Authorization, statement of compliance and basis of preparation

i) Authorization and Statement of Compliance

These consolidated financial statements have been approved and authorized for issue by the Board of Directors on 17 March 2011.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and all applicable IFRSs that have been adopted by the EU. IFRS comprise standards and interpretations approved by the International Accounting Standards Board ("IASB") and the International Financial Reporting Interpretations Committee ("IFRIC").

Effective 1 January 2005, the change in the Hungarian Accounting Act allows the Group to prepare its consolidated financial statements in accordance with IFRS that have been adopted by the EU. Currently, due to the endorsement process of the EU, and the activities of the Group, there is no difference in the policies applied by the Group between IFRS and IFRS that have been adopted by the EU.

ii) Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards and IFRIC interpretations issued and effective on 31 December 2010. The Group has early adopted IFRS 3 Business Combinations (Revised) and IAS 27 Consolidated and Separate Financial Statements in 2009 in advance of their effective date (1 July 2009).

TVK Plc. prepares its statutory unconsolidated financial statements in accordance with the requirements of the accounting regulations contained in Law C of 2000 on Accounting (HAS). Some of the accounting principles prescribed in this law differ from International Financial Reporting Standards (IFRS).

For the purposes of the application of the Historical Cost Convention, the consolidated financial statements treat the Company as having come into existence as of 31 December 1991, at the carrying values of assets and liabilities determined at that date, subject to the IFRS adjustments.

The financial year is the same as the calendar year.

iii) Principles of Consolidation

Subsidiaries

The consolidated financial statements include the accounts of TVK Plc. and the subsidiaries that it controls. This control is normally evidenced when the Group owns, either directly or indirectly, more than 50% of the voting rights of a company's share capital and is able to govern the financial and operating policies of an enterprise so as to benefit from its activities. As required by IAS 27, immediately exercisable voting rights are taken into account when determining control.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

The acquisition method of accounting is used for acquired businesses by measuring assets and liabilities at their fair values upon acquisition, the date of which is determined with reference to the date of obtaining control. The cost of an acquisition is measured at the aggregate of the consideration transferred and the amount of any non-controlling interest (formerly known as minority interest) in the acquiree. The income and expenses of companies acquired or disposed of during the year are included in the consolidated financial statements from the date of acquisition or up to the date of disposal.

Intercompany balances and transactions, including intercompany profits and unrealised profits and losses - unless the losses indicate impairment of the related assets - are eliminated. The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances.

Non-controlling interests represent the profit or loss and net assets not held by the Group and are shown separately in the consolidated balance sheet and the consolidated income statement, respectively. For each business combination, non-controlling interest is stated either at fair value or at the non-controlling interests' proportionate share of the acquiree's fair values of net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, the carrying amount of non-controlling interests is the initially recognised amount of those interests adjusted with the non-controlling interests' share of consecutive changes in equity. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a negative balance.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the company.

Joint ventures

A joint venture is a contractual arrangement whereby two or more parties (ventures) undertake an economic activity that is subject to joint control. Joint control exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the ventures. A jointly controlled entity is a joint venture that involves the establishment of a company, partnership or other entity to engage in economic activity that the Group jointly controls with its fellow ventures.

The Company's interests in its joint ventures are accounted for by the proportionate consolidation method, where a proportionate share of the joint venture's assets, liabilities, income and expenses is combined with similar items in the consolidated financial statements on a line-by-line basis. The financial statements of the joint ventures are prepared for the same reporting year as the parent company, using consistent accounting policies. The joint venture is proportionately consolidated until the date on which the Group ceases to have joint control over the venture.

When the Group contributes or sells assets to the joint venture, any portion of gain or loss from the transaction is recognized based on the substance of the transaction. When the Group purchases assets from the joint venture, the Group does not recognize its share of the profits of the joint venture from the transaction until it resells the assets to an independent party. Losses on intragroup transactions are recognised immediately if the loss provides evidence of reduced net realisable value of current assets or impairment loss.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

When the joint control is lost, the Group measures and recognises its remaining investment at its fair value unless the joint control does not become a subsidiary or associate. The difference between the carrying amount of the joint entity and the fair value of the remaining investment together with any proceeds from disposal is recognised in profit or loss.

Investments in associates

An associate is an entity over which the group is in a position to exercise significant influence through participation in the financial and operating policy decisions of the investee, but which is not a subsidiary or a jointly controlled entity.

The Group's investments in its associates are accounted for using the equity method of accounting. Under the equity method, the investment in the associate is carried in the balance sheet at cost plus post acquisition changes in the Group's share of net assets of the associate. Goodwill relating to an associate is included in the carrying amount of the investment and is not amortised. The income statement reflects the share of the results of operations of the associate. Where there has been a change recognized directly in the equity of the associate, the Group recognizes its share of any changes and discloses this, when applicable, in the statement of changes in equity. Profits and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

The reporting dates of the associate and the Group are identical and the associate's accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

Investments in associates are assessed to determine whether there is any objective evidence of impairment. If there is evidence that the recoverable amount of the investment is lower than its carrying value, then the difference is recognised as impairment loss in the income statement. Where losses were made in previous years, an assessment of the factors is made to determine if any loss may be reversed.

When the significant influence over the associate is lost, the Group remeasures and recognises any retaining investment at its fair value. The difference between the carrying amount of the associate and the fair value of the retaining investment together with any proceeds from disposal is recognised in profit or loss

Other consolidated entities

Special purpose entities are fully consolidated. Special purpose entities are companies which operate substantially in compliance with the Company business needs. It provides a supply of goods or services that is consistent with the Company's ongoing major or central operations. The substance of the relationship between an entity and the SPE indicates that the SPE is controlled by that entity.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

2.1 Changes in Accounting Policies

The accounting policies adopted are consistent with those applied in the previous financial years.

The Group has adopted the following new and amended IFRS and IFRIC interpretations during the year. Except as noted below, adoption of these standards and interpretations did not have any effect on the financial statements of the Group. They did however give rise to additional disclosures.

- *IFRS1 – First-time Adoption of International Financial Reporting Standards*

- *IFRS 2 – Share-based Payment*

- *IFRS 5 – Non-current assets Held for Sale and Discontinued Operations*

- *IFRS 8 – Operating Segments*

- *IAS 1 – Presentation of Financial Statements*

- *IAS 7– Statement of Cash Flows*

- *IAS 17– Leases*

- *IAS 36 – Impairment of Assets*

- *IAS 39 – Financial Instruments: Recognition and Measurement*

The principal effects of these changes are as follows:

IAS 7 Statement of Cash Flows

The amendment constitutes that only expenditure that results in asset recognition can be classified as “investing” in the statement of cash flows.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

2.2 Summary of significant accounting policies

i) Presentation Currency

Based on the economic substance of the underlying events and circumstances the functional currency of the parent company and the presentation currency of the Group has been determined to be the Hungarian Forint (HUF).

ii) Business Combinations

Business combinations are accounted for using the acquisition method. This involves assessing all assets and liabilities assumed for appropriate classification in accordance with the contractual terms and economic conditions and recognising identifiable assets (including previously unrecognized intangible assets) and liabilities (including contingent liabilities and excluding future restructuring) of the acquired business at fair value as at the acquisition date. Acquisition-related costs are recognised in profit or loss as incurred.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value as at the acquisition date and the resulting gain or loss is recognised in profit or loss.

Contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration are adjusted against the cost of acquisition, only if they qualify as period measurement adjustments and occur within 12 months from the acquisition date. All other subsequent changes in the fair value of contingent consideration are accounted for either in profit or loss or as changes to other comprehensive income. Changes in the fair value of contingent consideration classified as equity are not recognised.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost of the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the consideration transferred is lower than the fair value of the net assets of the acquiree, the difference is then recognised in profit or loss. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units, or groups of cash generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units. Each unit or group of units to which the goodwill is allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purposes, and is not larger than a segment based on the Group's reporting format determined in accordance with IFRS 8 Operating Segments.

Where goodwill forms part of a cash-generating unit (or group of cash generating units) and part of the operation within that unit (or group) is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

When subsidiaries are sold, the difference between the selling price and the net assets plus cumulative translation differences and un-amortized goodwill is recognized in the income statement.

iii) Investments and Other Financial Assets

Financial assets within the scope of IAS 39 are classified as either financial assets at fair value through profit or loss, loans and receivables, held to maturity investments, or available for sale financial assets, as appropriate. When financial assets are recognized initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. The Group considers whether a contract contains an embedded derivative when the entity first becomes a party to it.

Purchases and sales of investments are recognized on settlement date which is the date when the asset is delivered to the counterparty.

The Group's financial assets are classified at the time of initial recognition depending on their nature and purpose. Financial assets include cash and short-term deposits, trade receivables, loans and other receivables, quoted and unquoted financial instruments and derivative financial instruments.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss includes financial assets held for trading and financial assets designated upon initial recognition as at fair value through profit and loss.

Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments or a financial guarantee contract. Gains or losses on investments held for trading are recognized as finance income or finance expense in the income statement.

Financial assets may be designated at initial recognition as at fair value through profit or loss if the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis; or (ii) the assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy; or (iii) the financial asset contains an embedded derivative that would need to be separately recorded. Such financial assets are recorded as current, except for those instruments which are not due for settlement within 12 months from the balance sheet date and are not held with the primary purpose of being traded. In this case all payments on such instruments are classified as non-current.

As at 31 December 2010 and 2009, no financial assets have been designated as at fair value through profit and loss.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets which carry fixed or determinable payments have fixed maturities and which the Group has the positive intention and ability to hold to maturity. After initial measurement held to maturity investments are measured at amortised cost. This cost is computed as the amount initially recognized minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initially recognized amount and the maturity amount, less allowance for impairment. This calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums and discounts. Gains and losses are recognized in the income statement when the investments are derecognized or impaired, as well as through the amortisation process.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement loans and receivables are subsequently carried at amortised cost using the effective interest method less any allowance for impairment. Amortised cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the income statement when the loans and receivables are derecognized or impaired, as well as through the amortisation process.

Available-for-sale financial investments

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified in any of the three preceding categories. After initial measurement, available for sale financial assets are measured at fair value with unrealised gains or losses being recognized as other comprehensive income in the fair valuation reserve. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously recorded as other comprehensive income is recognized in the income statement.

After initial recognition available-for-sale financial assets are evaluated on the basis of existing market conditions and management intent to hold on to the investment in the foreseeable future. In rare circumstances when these conditions are no longer appropriate, the Group may choose to reclassify these financial assets to loans and receivables or held-to-maturity when this is in accordance with the applicable IFRS.

Fair Value

For investments that are actively traded in organised financial markets, fair value is determined by reference to quoted market prices at the close of business on the balance sheet date without any deduction for transaction costs. For investments where there is no quoted market price, fair value is determined by reference to the current market value of another instrument which is substantially the same or is calculated based on the expected cash flows of the underlying net asset base of the investment.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

iv) Classification and Derecognition of Financial Instruments

Financial assets and financial liabilities carried on the consolidated balance sheet include cash and cash equivalents marketable securities, trade and other accounts receivable and payable, long-term receivables, loans, borrowings, investments, and bonds receivable and payable. The accounting policies on recognition and measurement of these items are disclosed in the respective accounting policies found in this Note.

Financial instruments (including compound financial instruments) are classified as assets, liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains, and losses relating to a financial instrument classified as a liability, are reported as expense or income as incurred. Distributions to holders of financial instruments classified as equity are charged directly to equity. In case of compound financial instruments the liability component is valued first, with the equity component being determined as a residual value. Financial instruments are offset when the Company has a legally enforceable right to offset and intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

The derecognition of a financial asset takes place when the Group no longer controls the contractual rights that comprise the financial asset, which is normally the case when the instrument is sold, or all the cash flows attributable to the instrument are passed through to an independent third party. When the Group neither transfers nor retains all the risks and rewards of the financial asset and continues to control the transferred asset, it recognises its retained interest in the asset and a liability for the amounts it may have to pay.

v) Derivative Financial Instruments

The Group uses derivative financial instruments such as forward currency contracts and interest rate swaps to hedge its risks associated with interest rate and foreign currency fluctuations. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives that do not qualify for hedge accounting are taken directly to net profit or loss for the year as financial income or expense.

The fair value of forward currency contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of interest rate swap contracts is determined by reference to market values for similar instruments.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

An embedded derivative is separated from the host contract and accounted for as a derivative if all of the following conditions are met:

- the economic characteristics and the risks of the embedded derivative are not closely related to the economic characteristics of the host contract,
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative, and
- a hybrid (combined) instrument is not measured at fair value with changes in fair value reported in current year net profit.

vi) Hedging

For the purpose of hedge accounting, hedges are classified as

- fair value hedges
- cash flow hedges or
- hedges of a net investment in a foreign operation.

A hedge of the foreign currency risk of a firm commitment is accounted for as a cash flow hedge. At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges which meet the strict criteria for hedge accounting are accounted for as follows:

Fair value hedges

Fair value hedges are hedges of the Group's exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment, or an identified portion of such an asset, liability or firm commitment, that is attributable to a particular risk that could affect the income statement.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

For fair value hedges, the carrying amount of the hedged item is adjusted for gains and losses attributable to the risk being hedged, the derivative is remeasured at fair value and gains and losses from both are taken to the income statement. For fair value hedges relating to items carried at amortised cost, the adjustment to carrying value is amortised through the income statement over the remaining term to maturity. Any adjustment to the carrying amount of a hedged financial instrument for which the effective interest method is used is amortised to the income statement.

Amortisation may begin as soon as an adjustment exists and shall begin no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

When an unrecognized firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognized as an asset or liability with a corresponding gain or loss recognized in the income statement. The changes in the fair value of the hedging instrument are also recognized in the income statement.

The Group discontinues fair value hedge accounting if the hedging instrument expires or is sold, terminated or exercised, the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation.

Cash-flow hedges

Cash flow hedges are a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction that could affect the income statement. The effective portion of the gain or loss on the hedging instrument is recognized directly as other comprehensive income, while the ineffective portion is recognized in the income statement.

Amounts taken to other comprehensive income are transferred to the income statement when the hedged transaction affects the income statement, such as when hedged financial income or financial expense is recognized or when a forecast sale or purchase occurs. Where the hedged item is the cost of a non-financial asset or liability, the amounts previously taken to equity are transferred to the initial carrying amount of the non-financial asset or liability.

If the forecast transaction is no longer expected to occur, amounts previously recognized in equity are transferred to the income statement. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognized in other comprehensive income remain in other comprehensive income until the forecast transaction occurs. If the related transaction is not expected to occur, the amount is taken to the income statement.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Hedges of a net investment

Hedges of a net investment in a foreign operation, including a hedge of a monetary item that is accounted for as part of the net investment, are accounted for in a way similar to cash flow hedges. Gains or losses on the hedging instrument relating to the effective portion of the hedge are recognized as other comprehensive income while any gains or losses relating to the ineffective portion are recognized in the income statement. On disposal of the foreign operation, the cumulative value of any such gains or losses recognized as other comprehensive income is transferred to the income statement. The Company had no derivative financial instrument and hedging transactions in 2009 and 2010.

vii) Impairment of financial assets

The Group assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. Impairment losses on a financial asset or group of financial assets are recognised only if there is an objective evidence of impairment due to a loss event and this loss event significantly impacts the estimated future cash flows of the financial asset or group of financial assets.

Assets carried at amortised cost

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of the loss is recognized in the income statement.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for financial assets, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the income statement, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Available-for-sale financial investments

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortisation) and its current fair value, less any impairment loss previously recognized in the income statement, is transferred from other comprehensive income to the income statement. Impairment losses recognized on equity instruments classified as available for sale is not reversed, increases in their fair value after impairment are recognised directly in other comprehensive income. Impairment losses recognized on debt instruments classified as available-for-sale are reversed through income statement, if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognized in the income statement.

viii) Cash and Cash Equivalents

Cash includes cash on hand and cash at banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with maturity less than three months from the date of acquisition and that are subject to an insignificant risk of change in value.

ix) Trade Receivables

Receivables are stated at face value less provision for doubtful amounts. Where the time value of money is material, receivables are carried at amortized cost. A provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all of the amounts due under the original terms of the invoice. Impaired debts are derecognized when they are assessed as uncollectible.

If collection of trade receivables is expected within the normal business cycle which is one year or less, they are classified as current assets. If not, they are presented as non-current assets.

x) Inventories

Inventories, including work-in-progress are valued at the lower of cost and net realisable value, after provision for slow-moving and obsolete items. Net realisable value is the selling price in the ordinary course of business, less the costs of making the sales. Cost of purchased goods, including naphtha and purchased gas oil inventory, is determined primarily on the basis of weighted average cost. The acquisition cost of own produced inventory consists of direct materials, direct wages and the appropriate portion of production overhead expenses including royalty. Unrealisable and unusable inventory is fully written off.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

xi) Property, Plant and Equipment

Property, plant and equipment are stated at historical cost (or the carrying value of the assets determined as of 31 December 1991) less accumulated depreciation, depletion and accumulated impairment loss. When assets are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in the consolidated income statement.

The initial cost of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use, such as borrowing costs. Estimated decommissioning and site restoration costs are capitalized upon initial recognition or, if decision on decommissioning is made subsequently, at the time of the decision. Changes in estimates thereof adjust the carrying amount of assets. Expenditures incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance and overhead costs (except form periodic maintenance costs), are normally charged to income in the period in which the costs are incurred. Periodic maintenance costs are capitalized as a separate component of the related assets.

Construction in progress represents plant and properties under construction and is stated at cost. This includes cost of construction, plant and equipment and other direct costs. Construction-in-progress is not depreciated until such time as the relevant asset is available for use.

xii) Intangible Assets

Intangible assets acquired separately are capitalized at cost and from business acquisitions are capitalized at fair value as at the date of acquisitions. Intangible assets are recognized if it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise; and the cost of the asset can be measured reliably.

Following initial recognition, the cost model is applied to the class of intangible assets. The useful lives of these intangible assets are assessed to be either finite or indefinite. Amortization is charged on assets with a finite useful life over the best estimate of their useful lives using the straight line method. The amortization period and the amortization method are reviewed annually at each financial year-end. Intangible assets, excluding development costs, created within the business are not capitalized and expenditure is charged against income in the year in which the expenditure is incurred. Intangible assets are tested for impairment annually either individually or at the cash generating unit level.

Research costs are expensed as incurred. Development expenditure incurred on an individual project is carried forward when its future recoverability can reasonably be regarded as assured. Following the initial recognition of the development expenditure the cost model is applied requiring the asset to be carried at cost less any accumulated impairment losses. Costs in development stage can not be amortized. The carrying value of development costs is reviewed for impairment annually when the asset is not yet in use, or more frequently when an indicator of impairment arises during the reporting year indicating that the carrying value may not be recoverable.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

xiii) Depreciation, Amortization

Depreciation of each component of an intangible asset and property, plant and equipment is computed on a straight-line basis using the following rates:

Software	20 – 33%
Buildings and infrastructure	2 – 10%
Production machinery and equipment	5 – 14.5%
Office and computer equipment	14.5 – 50%
Vehicles	10 – 20%

Amortization of leasehold improvements is provided using the straight-line method over the term of the respective lease or the useful life of the asset, whichever period is less.

Periodic maintenance costs are depreciated until the next similar maintenance takes place.

The useful life and depreciation methods are reviewed at least annually to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from items of property, plant and equipment and, if necessary, changes are accounted for in the current period.

The base of the depreciation of security and strategic spare parts is the average depreciation rate of technical equipments and vehicles relating to the production.

xiv) Impairment of Assets

Property, plant and equipment and intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the income statement for items of property, plant and equipment and intangibles carried at cost. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The fair value is the amount obtainable from the sale of an asset in an arm's length transaction while value in use is the present value of estimated net future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Recoverable amounts are estimated for individual assets or, if this is not practicable, for the cash-generating unit.

The Group assesses at each reporting date whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. A previously recognised impairment loss is reversed only if there has been a change in the impairment assumptions considered when the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset neither exceeds its recoverable amount, nor is higher than its carrying amount net of depreciation, had no impairment loss been recognised in prior years.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units), to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount of the cash-generating unit (group of cash-generating units) to which goodwill has been allocated, an impairment loss is recognized. Impairment losses relating to Goodwill cannot be reversed in future periods. The Group performs its annual impairment test of goodwill as at 31 December.

Intangible assets with indefinite useful lives are monitored for impairment indicators throughout the year and are tested for impairment at least annually as of 31 December either individually or at the cash generating unit level, as appropriate.

Cash generating units

The Company identified two cash generating units (CGU) which are the ethylene production of Olefin plants for sales and the production of Olefin plants for internal use for the production of polymers.

The recoverable amount of each CGU has been determined based on a value in use calculation using cash flow projections based on financial budgets approved by senior management covering a 15-year period. The average pre-tax discount rate applied to cash flow projections is 9.43 % (2009: 10.19 %).

The calculation of value in use for cash generating units are most sensitive to the following assumptions:

- Raw materials price;
- Product price;
- Exchange rate;
- Material balance; and
- Discount rates.

With regard to the assessment of value in use of these cash-generating units, the management believes that no reasonably possible change in any of the above key assumptions would cause the carrying value of the units to materially exceed its recoverable amount.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

xv) Interest-bearing loans and borrowings

All loans and borrowings are initially recognized at the fair value of the consideration received net of issue costs associated with the borrowing. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses are recognized in net in the income statement when the liabilities are derecognized, as well as through the amortisation process, except to the extent they are capitalized as borrowing costs.

xvi) Provisions

A provision is recognized when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of the provision to be reimbursed; the reimbursement is recognised as a separate asset but only when the reimbursement is actually certain. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. The amount of the provision is the present value of the risk adjusted expenditures expected to be required to settle the obligation, determined using the estimated risk free interest rate as discount rate. Where discounting is used, the carrying amount of the provisions increases in each period to reflect the unwinding of the discount by the passage of time. This increase is recognized as interest expense.

Provision for Redundancy

The employees of the Group are eligible, immediately upon termination, for redundancy payment pursuant to the Hungarian law and the terms of the Collective Agreement between TVK and its employees. The amount of such a liability is recorded as a provision in the consolidated balance sheet when the workforce reduction program is defined, announced and the conditions for its implementation are met.

Provision for Environmental Expenditures

Environmental expenditures that relate to current or future economic benefits are expensed or capitalized as appropriate. Expenditures that relate to an existing condition caused by past operations and do not contribute to current or future earnings are expensed. Liabilities for environmental costs are recognized when environmental assessments or clean-ups are probable and the associated costs can be reasonably estimated. Generally, the timing of these provisions coincides with the commitment to a formal plan of action or, if earlier, on divestment or on closure of inactive sites. The amount recognized is the best estimate of the expenditure required. Where the liability will not be settled for a number of years, the amount recognized is the present value of the estimated future expenditure.

Provision for litigations

TVK Group entities are parties to a number of litigations, proceedings and civil actions arising in the ordinary course of business. Management uses estimations when the most likely outcome of these actions is assessed and provision is recognized on a consistent basis.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Provision for Retirement Benefits

The Group operates long term employee benefit program. None of these schemes requires contribution to be made to separately administered funds. The cost of providing benefits under those plans is determined separately for each plan using the projected unit credit actuarial valuation method. Actuarial gains and losses are recognized as income or expense immediately. Past service costs, resulting from the introduction of, or changes to the defined benefit scheme are recognized as an expense on a straight-line basis over the average period until the benefits become vested.

Provision for Old Team benefits

Based on the valid Collective Agreement, the Company pays Old Team benefits to its employees as follows: Every five years, the Company pays a fix set amount to all employees who had worked at least 10 years for the Company. Based on actuarial calculations, the Company made provision for Old Team benefits of current employees that reflects the expected payments based on their past service levels.

xvii) Greenhouse gas emissions

The Group receives free emission rights in Hungary as a result of the European Emission Trading Schemes. The rights are received on an annual basis and in return the Group is required to remit rights equal to its actual emissions. The Group has adopted a net liability approach to the emission rights granted. A provision is only recognized when actual emissions exceed the emission rights granted and still held. Where emission rights are purchased from other parties, they are recorded at cost, and treated as a reimbursement right, whereby they are matched to the emission liabilities and remeasured to fair value.

xviii) Share-based payment transactions

Certain employees (including directors and managers) of the Group receive remuneration in the form of share-based payment transactions, whereby employees render services in exchange for shares or rights over shares ('equity-settled transactions').

Equity-settled transactions

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by applying generally accepted option pricing models (usually by the binomial model). In valuing equity-settled transactions, no account is taken of any performance conditions, other than conditions linked to the price of the shares of the parent company ('market conditions').

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

The cost of equity-settled transactions is recognized, together with a corresponding increase in equity, over the period in which the performance conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ('vesting date'). The cumulative expense recognized for equity settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the number of awards that, in the opinion of the directors of the Group at that date, based on the best available estimate of the number of equity instruments that will ultimately vest.

No expense is recognized for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied, provided that all other performance conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognized as if the terms had not been modified. An additional expense is recognized for any increase in the value of the transaction as a result of the modification, as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

Cash-settled transactions

The cost of cash-settled transactions is measured initially at fair value at the grant date using the binomial model. This fair value is expensed over the vesting period with recognition of a corresponding liability. The liability is remeasured at each balance sheet date up to and including the settlement date to fair value with changes therein recognized in the income statement.

xix) Leases

The determination whether an arrangement contains or is a lease depends on the substance of the arrangement at inception date. If fulfilment of the arrangement depends on the use of a specific asset or conveys the right to use the asset, it is deemed to contain a lease element and is recorded accordingly.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income. Capitalized leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term. Initial direct costs incurred in negotiating a finance lease are added to the carrying amount of the leased asset and recognized over the lease term on the same bases as the lease income. Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term.

xx) Government grants

Government grants are recognized at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognized as income over the years necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the income statement over the expected useful life of the relevant asset by equal annual instalments.

xxi) Reserves

Reserves shown in the consolidated financial statements do not represent the distributable reserves for dividend purposes. Reserves for dividend purposes are determined based on the company-only statutory earnings of TVK Plc.

Translation reserves

The translation reserve represents translation differences arising on consolidation of financial statements of foreign entities. Exchange differences arising on a monetary item that, in substance, forms part of the company's net investment in a foreign entity are classified as other comprehensive income in the consolidated financial statements until the disposal of the net investment. Upon disposal of the corresponding assets, the cumulative revaluation or translation reserves are recognized as income or expenses in the same period in which the gain or loss on disposal is recognized.

Fair valuation reserves

The fair valuation reserve includes the cumulative net change in the fair value of effective cash flow hedges and available for sale financial instruments.

Equity component of debt and difference in buy-back prices

Equity component of compound debt instruments includes the residual amount of the proceeds from the issuance of the instrument above its liability component, which is determined as the present value of future cash payments associated with the instrument. The equity component of compound debt instruments is recognized when the Group becomes party to the instrument.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

xxii) Treasury Shares

The nominal value of treasury shares held is deducted from registered share capital. Any difference between the nominal value and the acquisition price of treasury shares is recorded directly to share premium.

xxiii) Dividends

Dividends are recorded in the year in which they are approved by the shareholders.

xxiv) Revenue Recognition

Revenue is recognized when it is probable that the economic benefits associated with a transaction will flow to the enterprise and the amount of the revenue can be measured reliably. Sales are recognized net of sales taxes and discounts when delivery of goods or rendering of the service has taken place and transfer of risks and rewards has been completed.

Interest is recognized on a time-proportionate basis that reflects the effective yield on the related asset. Dividends due are recognized when the shareholder's right to receive payment is established. Changes in the fair value of derivatives not qualifying for hedge accounting are reflected in income in the period the change occurs.

xxv) Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are ready for their intended use. Borrowing costs include interest charges and other costs incurred in connection with the borrowing of funds, including exchange differences arising from foreign currency borrowings used to finance these projects to the extent that they are regarded as an adjustment to interest costs.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

xxvi) Income Taxes

The income tax charge consists of current and deferred taxes.

The current income tax is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated income statement because of items of income or expense that are never taxable or deductible or are taxable or deductible in other years. The Group's current income tax is calculating using tax rates that have been enacted or substantively enacted by the end of the reporting year.

Deferred taxes are calculated using the balance sheet liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The measurement of deferred tax liabilities and deferred tax assets reflects the tax consequences that would follow from the manner in which the enterprise expects, at the balance sheet date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and tax losses when it is probable that sufficient taxable profits will be available against which the deferred tax assets can be utilized, except:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

At each balance sheet date, the Company re-assesses unrecognized deferred tax assets and the carrying amount of deferred tax assets. The enterprise recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered. The Company conversely reduces the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of the deferred tax asset to be utilised.

Current tax and deferred tax are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly to equity, including an adjustment to the opening balance of reserves resulting from a change in accounting policy that is applied retrospectively.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities which relate to income taxes imposed by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

xxvii) Foreign Currency Transactions

Foreign currency transactions are recorded in the reporting currency by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction. Exchange rate differences arising on the settlement of monetary items at rates different from those at which they were initially recorded during the periods are recognized in the consolidated income statement in the period in which they arise. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. Items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Foreign exchange differences on trade receivables and payables are included in operating profit, while foreign exchange differences on borrowings are recorded as financial income or expense.

Financial statements of foreign entities are translated at year-end exchange rates with respect to the balance sheet, and at the weighted average exchange rates for the year with respect to the income statement. All resulting translation differences are included in the translation reserve in other comprehensive income. On disposal of a foreign entity, the deferred cumulative amount recognized in other comprehensive income relating to that particular foreign operation shall be recognized in the income statement. Any exchange differences that have previously been attributed to non-controlling interests are derecognised, but they are not reclassified to profit or loss.

In case of a partial disposal of a subsidiary without any loss of control in the foreign operation, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other disposals such as associates or jointly controlled entities not involving a change of accounting basis, the proportionate share of accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

xxviii) Earnings Per Share

The calculation of basic earnings per share is based on the profit attributable to ordinary shareholders using the weighted average number of shares outstanding during the year after deduction of the average number of treasury shares held over the period.

The calculation of diluted earnings per share is consistent with the calculation of basic earnings per share while giving effect to all dilutive potential ordinary shares that were outstanding during the period, that is:

- the net profit for the period attributable to ordinary shares is increased by the after-tax amount of dividends and interest recognised in the period in respect of the dilutive potential ordinary shares and adjusted for any other changes in income or expense that would result from the conversion of the dilutive potential ordinary shares.
- the weighted average number of ordinary shares outstanding is increased by the weighted average number of additional ordinary shares which would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

xxix) Segmental Disclosure

The Group has two major divisions (Petrochemicals – Corporate and other) that serve as the primary basis for the Company's segment reporting purposes. The Group shows net sales by geographical area.

xxx) Contingencies

Contingent liabilities are not recognized in the consolidated financial statements unless they are acquired in a business combination. They are disclosed in the Notes unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

31 December 2010

2.3 Significant accounting judgments and estimates

Critical judgments in applying the accounting policies

In the process of applying the accounting policies, which are described in note 2.2 above, management has made certain judgments that have a significant effect on the amounts recognized in the financial statements (apart from those involving estimates, which are dealt with below). These are detailed in the respective notes, however, the most significant judgments relate to:

- Outcome of certain litigations
- assessment of control (over operation) of TVK Erőmű Kft. and Tisza WTP (Note 1)

Sources of estimate uncertainty

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the amounts reported in the financial statements and the Notes thereto. Although these estimates are based on the management's best knowledge of current events and actions, actual results may differ from those estimates. These are detailed in the respective notes, however, the most significant estimates relate to the following:

- Scope of environmental provision and quantification and timing of environmental liabilities (Note 15, 28)
- The availability of taxable income against which deferred tax assets can be recognized (Note 25)
- Actuarial estimate applied in the calculation of retirement benefit obligations (Note 15)
- Determination of useful lives of property, plant and equipment and intangibles
- Impairment of tangible assets and intangibles (Notes 4, 5)

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

2.4 Issued but not yet effective International Financial Reporting Standards

At the date of authorisation of these financial statements, the following standards and interpretations were in issue but not yet effective:

IFRS 9 Financial Instruments – Classification and measurement

The IFRS 9 was issued on 12 November 2009 and is intended to replace IAS 39 *Financial Instruments: Recognition and measurement*. The standard introduces new requirements for classifying and measuring financial assets that must be applied starting 1 January 2013. According to IFRS 9 all financial assets are initially recognised at fair value plus transaction costs. The standard also eliminates the available-for-sale and held-to-maturity categories currently existing in IAS 39. Classification of currently existing financial instruments of the Group will change accordingly.

IAS 24 - Related Party Disclosure

The amendments to IAS 24 *Related Party Disclosures* become effective for financial years beginning on or after 1 January 2011 and must be applied retrospectively. The revised standard simplifies the disclosure requirements for entities that are controlled, jointly controlled or significantly influenced by a government and clarifies the definition of a related party. As a result, such a reporting entity is exempt from the general disclosure requirements in relation to transactions and balances with the government and government-related entities. The amendment has no impact on the disclosures of the Group.

IAS 32 Financial Instruments: Presentation

The amendment to IAS 32 is effective for annual periods beginning on or after 1 February 2010 and requires that rights, options and warrants to acquire a fixed number of an entity's own equity instruments for a fixed price of any currency are equity instruments if certain criteria are met. The amendment will have no impact on the financial position of the Group.

IFRIC 14 – IAS 19-The limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction

The amendment to IFRIC 14 Prepayments of a minimum funding requirement was issued to remove the unintended consequence in IFRIC 14 that in some cases entities are not permitted to recognize as an asset some voluntary prepayments for minimum funding contributions. The amendment becomes effective 1 January 2011 and has no material impact on the Group.

IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments

The interpretation of IFRIC 19 addresses the accounting by an entity that issues equity instruments to settle financial liability. The equity instrument is measured at fair value and the financial liability is derecognized, fully or partly, based on the "consideration paid". The interpretation is effective for annual periods beginning on or after 1 July 2010.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Improvements to IFRSs

In May 2010 the Board issued its first collection of amendments to its standards, primarily to remove inconsistencies and clarify wording. These amendments will be effective from 1 January 2011 unless otherwise stated. The Group has not yet adopted the following amendments but it is anticipated that these changes will have no material effect on the Group's financial statements.

IFRS 1 First-time Adoption of International Financial Reporting Standards

The annual improvements to IFRS 1 include: a) accounting policy changes in the year of IFRS adoption - if a first-time adopter changes its accounting policies or the use of exemptions in IFRS 1 after it has published its interim financial report in accordance with IAS 34 but before its first IFRS financial statements, it should explain those changes; b) revaluation basis as deemed cost – clarifies that a first-time adopter is permitted to use event-driven fair value as deemed cost during the first IFRS period and c) use of deemed cost for operations subject to rate regulation for certain items of property, plant and equipment or intangibles.

IFRS 3 Business Combinations

Amendment to IFRS 3 specifies that the option to measure non-controlling interests either at fair value or at proportionate share of the acquiree's net identifiable assets applies only to non-controlling interests that are present ownership interests. All other components of non-controlling interests should be measured at their acquisition date fair value, unless another measurement basis is required by IFRSs.

IFRS 3 specifies that requirements to measure awards of the acquirer that replace acquiree share-based payment transactions with regards to IFRS 2 applies also to such transactions of the acquiree that are not replaced. The amendment also clarifies that market-based measurement of replacement awards applies to all replacement awards regardless of whether the acquirer is obliged to replace the awards or does so voluntarily.

The last amendment to IFRS 3 clarifies that IAS 32, IAS 39 and IFRS 7 do not apply to contingent consideration from a business combination which occurred before the effective date of the revised standard IFRS 3 in 2008.

All amendments to IFRS 3 are effective for annual period beginning on or after 1 July 2010.

IFRS 7 Financial Instruments: Disclosures

The improvement to IFRS 7 clarifies disclosure requirements regarding credit risk and collateral held in order to enable users better to understand the nature and extent of risks arising from financial instruments.

IAS 1 Presentation of Financial Statements

The amendment to IAS 1 clarifies that the entity may elect to present the analysis of other comprehensive income by item either in the statement of changes in equity or in the notes to the financial statements.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

IAS 27 Consolidated and Separate Financial Statements

The amendment to IAS 27 clarifies that amendments made to IAS 21, IAS 28, and IAS 31 as a result of IAS 27 revisions in 2008 should be applied prospectively with some exceptions. The amendment is effective 1 July 2010.

IAS 34 Interim Financial Reporting

Amendments to IAS 34 clarify how significant events and transactions in interim periods should update the relevant information presented in the most recent annual financial report.

31 December 2010

Financial information on associates

Main financial data of the Group associates at 31 December 2010 (These amounts represent 100% of the values of the companies reported by those companies in accordance with IFRS):

	Total assets	Liabilities	Total operating revenues	Profit and loss for the year
	HUF million	HUF million	HUF million	HUF million
TMM Tűzoltó és Műszaki Mentő Kft.	505	66	537	31

Main financial data of the Group associates at 31 December 2009 (These amounts represent 100% of the values of the companies reported by those companies in accordance with IFRS):

	Total assets	Liabilities	Total operating revenues	Profit and loss for the year
	HUF million	HUF million	HUF million	HUF million
TMM Tűzoltó és Műszaki Mentő Kft.	454	45	532	15

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

7. Other non-current assets

The Group's other non-current assets as of 31 December 2010 and 2009 were as follows:

	31 December 2010 HUF million	31 December 2009 HUF million
Government bonds**	200	185
Loan to Plastico S.A.*	-	-
Other***	2	6
Total	202	191

*In 2002, TVK Plc. sold its investment in Plastico S.A. In 2006, based on a legal opinion, the Company reassessed the recoverability of its outstanding loan receivable from Plastico S.A. and decided to fully write it off. Net of impairment of HUF 575 million as of 31 December 2010 and 2009, respectively (See Note 10.).

**Long-term securities include type 2013/C government bonds maturing in December 2013. Government bonds bear a floating interest rate equivalent to the Treasury Bonds previous 6 month average interest rate. These bonds are accounted for as held to maturity instruments.

*** It contains loans given which are interest free in the amount of HUF 2 million in 2010 (HUF 6 million 2009).

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

8. Inventories

Inventories as of 31 December 2010 and 2009 were as follows:

	At cost	Net book value	At cost	Net book value
	31 December 2010		31 December 2009	
	HUF million			
Work in progress and finished goods	6,661	6,533	5,071	5,071
Raw-material	2,546	2,546	1,837	1,837
Other materials	1,036	788	956	716
Purchased goods	269	269	128	128
Total	10,512	10,136	7,992	7,752

The Group believes that the level of provision as of 31 December 2010 is sufficient to cover potential future losses. As of 31 December 2010 and 2009, no inventory owned by TVK Plc. was pledged as collateral.

The total amount of impairment was HUF 376 million and HUF 240 million as of 31 December 2010 and 2009, respectively (as cumulated figures).

Inventories are regularly reviewed for impairment.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

9. Trade receivables, net

Receivables as of 31 December 2010 and 2009 were as follows:

	31 December 2010 HUF million	31 December 2009 HUF million
Domestic debtors	26,763	20,416
- of which: MOL Group members	8,988	7,016
Associates	-	-
Borsodchem	3,222	2,005
Export debtors	23,368	23,238
- of which: MOL Group members	1,061	747
	<u>50,131</u>	<u>43,654</u>
Less: provision for doubtful debts	(189)	(198)
Total	<u>49,942</u>	<u>43,456</u>

Movements in the provision for doubtful receivables were as follows:

	31 December 2010 HUF million	31 December 2009 HUF million
At 1 January	198	96
Additions	3	104
Reversal	(12)	(2)
	<u>189</u>	<u>198</u>

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

As at 31 December 2010 and 2009 the analysis of trade receivables that were past due is as follows:

	31 December 2010	31 December 2009
	HUF million	HUF million
Neither past due nor impaired	48,176	40,592
Past due but not impaired	1,766	2,864
Within 90 days	1,754	2,034
91 - 180 days	4	483
Over 180 days	8	347
Total	<u>49,942</u>	<u>43,456</u>

The Group recorded a write-off on doubtful debts of HUF 30 million and HUF 1 million in 2010 and 2009, respectively. Income from bad debts and written off receivables amounted to HUF 5 million and HUF 10 million in 2010 and 2009, respectively.

To assess provision for doubtful debts, the Company estimated incurred losses that arise due to the liquidity problems of certain major debtors. The provision has been determined by reference to past default experience.

Export receivables are denominated primarily in EUR, USD and PLN and are recorded at the exchange rate as of 31 December 2010 and 2009. The resulting gain or loss is classified in a net amount either as other income or other expense, respectively (see notes 20 and 23) in the accompanying income statements.

14. Long-term debt, net of current portion

Long-term debt, net of current portion as of 31 December 2010 and 2009 were as follows:

	Weighted average interest rate 2010 %	Weighted average interest rate 2009 %	31 December 2010 HUF million	31 December 2009 HUF million
Secured bank loan of TVK Erőmű Kft. in EUR*	1.62%	2.54%	7,318	7,866
Secured bank loan of Tisza-WTP Kft. in EUR**	1.63%	3.10%	1,234	1,335
Unsecured loan in EUR from MOL Plc. (majority stakeholder)***			4,169	-
Other****			3,446	3,324
Total long term debt			16,167	12,525
Current portion of long-term debt			976	893
Total long-term debt, net of current portion			15,191	11,632

*On 26 July 2002, TVK Erőmű Kft. signed a project financing agreement with OTP Bank Rt., and the facility, that amounted to HUF 9,810 million (EUR 40 million), had been fully drawn by 31 December 2004. The loan is secured by a pledge on TVK Erőmű Kft's assets. At the end of 2010 the short-term part of the loan amounts to HUF 834 million (EUR 2,992 thousand) reported as short-term loan payable.

** In order to implement a water treatment plant to be operated by Tisza WTP Kft., on 17 December 2002, the Kft. signed a long-term project and development loan agreement for HUF 1,883 million (EUR 8 million) with OTP Bank Rt. By the end of the availability period (29 December 2003), the Kft. had drawn down a total of EUR 7,340,000 from the facility. The project loan is secured by the Company's assets. At the end of 2010, Tisza WTP Kft. reclassified an instalment of HUF 148 million (EUR 532 thousand) due in 12 months to current liabilities.

*** On 21 December 2009, a revolving loan contract was made between TVK Plc. and MOL Plc. in an amount of EUR 100 million. The Company transferred the whole amount of short term loan into long term loans on April, 2010, then modified the loan contract and divided the credit line into long term part (EUR 80 million) and short term part (EUR 20 million) on 12 November 2010.

**** According to service agreement the shareholding of the majority owners of the capital of TVK Erőmű Kft. and Tisza WTP Kft. is to be reimbursed during the lifetime of the project, and is recorded as other long-term debt in accordance with IAS 32, as it qualifies as a financial liability.

Secured loans were obtained for specific capital expenditure projects and are secured by the assets financed from the loan.

According to maturity the long-term debts were as follows:

	31 December 2010 HUF million	31 December 2009 HUF million
Maturity two to five years	8,725	4,165
Maturity over five years	6,466	7,467
Total	15,191	11,632

**Notes to the consolidated financial statements prepared

Non-current portion 31 December 2010	1,836	35	267	183	-	-	2,321

Environmental provision

The amount of provision contains the discounted value of amounts estimated for 12 years. The environmental provision might further increase subject to the completion of an ongoing environmental survey. (See Note 28) The amount of the provision has been determined on the basis of existing technology at current prices by calculating risk-weighted cash flows discounted using estimated risk-free real interest rates.

Provision for severance

The provision for severance equals to the amount of severance payments due but not yet paid as at 31 December 2010.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Provision for long term employee retirement benefits

TVK operates benefit schemes that provide lump sum benefit to all employees at the time of their retirement. TVK employees are entitled for maximum of 2 months of final salary respectively, depending on the length of service period. None of these plans have separately administered funds. The value of provision has been determined using the projected unit credit method, based on financial and actuarial variables and assumptions that reflect relevant official statistical data and are in line with those incorporated in the business plan of TVK. Principal actuarial assumptions state an approximately 2% difference between the discount rate and the future salary increase. As of 31 December 2010 the Company has recognized a provision of HUF 300 million to cover its estimated obligation regarding future retirement benefits payable to current employees expected to retire from group entities.

Provision for Old Team benefits

Every five years, TVK pays a fix set amount to all employees who had worked at least 10 years for the Company. On 31 December 2010, based on actuarial calculations, the Company made HUF 206 million provision for the future Old Team benefits of current employees.

Provision for litigations

TVK Group entities are parties to a number of litigations, proceedings and civil actions arising in the ordinary course of business. The management uses estimates where the most likely outcome of these actions is assessed and provision is recognized on a consistent basis. As of 31 December 2010 the Group has recognized a provision of HUF 13 million to cover risks associated with litigations.

The following table summarises the main financial and actuarial variables and assumptions based on which the amounts of retirement benefits were determined:

	2010	2009
Discount rate in %	2.0-4.3	3.0-5.0
Average wage increase in %	0-2.3	1.0-3.0
Mortality index (male)	0.06-3.45	0.06-3.45
Mortality index (female)	0.02-1.50	0.02-1.50

Other	(7)	(8)
Total financial expenses	(2,919)	(2,257)
Total financial income / (expense), net	(2,694)	(1,695)

* Interest expense of the Group for 2010 includes HUF 357 million (2009: HUF 690 million), being the share from the net income of TVK Erőmű Kft. of its majority shareholder (ÉMÁSZ Nyrt.), and Tisza WTP Kft. of shareholder (Sinergy Kft.). The share in 2010 from the net income of TVK Erőmű Kft. did not contain the planned reduction of share capital. It will be reduced in 2011.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

25. Income taxes

Corporate income tax:

In 2010, TVK Plc. had a negative profit before taxation, which was further decreased by the tax base corrections, thus no corporate income tax occurred. The current corporate income taxes contain the consolidated companies' corporate income taxes.

Deferred tax:

Total applicable income taxes reported in the consolidated financial statements for the years ended 31 December 2010 and 2009 include the following components:

	2010 HUF million	2009 HUF million
Local trade tax	757	585
Current corporate income taxes	490	196
Robin Hood tax	48	-
Innovation fee	12	11
Deferred income taxes	(2,126)	(876)
Total income tax expense / (benefit)	(819)	(84)

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

The deferred income/expense consisted of the following items as of 31 December 2010 and 2009:

	Balance sheet		Effect on profit and loss	
	2010 HUF million	2009 HUF million	2010 HUF million	2009 HUF million
Depreciation	6,301	10,608	(4,307)	2,675
Environmental provision	(203)	(374)	171	36
Statutory tax losses carried forward	(4,348)	(5,454)	1,106	(3,011)
Impairment losses and other provisions	(491)	(1,380)	889	(658)
Differences due to capitalisation according to IFRS	15	37	(22)	(4)
Capitalized periodic maintenance cost	147	110	37	86
Other	0	0	0	0
Total deferred tax liability	1,421	3,547	(2,126)	(876)

The Group recognized HUF 4,348 million deferred tax assets from tax losses of HUF 43,482 million (of which TVK Plc. HUF 39,118 million, TVK-Erőmű Kft. HUF 2,889 million, TVK Ingatlankezelő Kft. HUF 1,352 million, Tisza Wtp. Kft. HUF 123 million) that are available indefinitely for offset against future taxable profits of the companies in which the losses arose. The amount of such tax losses was HUF 28,706 million as of 31 December 2009. Deferred tax assets arising from negative profit before tax at group companies are not recognized if it is probable that no future taxable income will be available to offset these deferred tax assets. In 2010 the Group has recognized deferred tax effects in respect of losses at Group companies.

The temporary difference relating to foreign subsidiaries have not been recognized because of the xxvi.) section of the accounting policy. Deferred tax of the foreign subsidiaries was not significant.

26. Earnings per share (EPS)

The Group's earnings per share based on consolidated information for 31 December 2010 and 2009 are as follows:

	2010	2009
Net income/(loss), IFRS (million HUF)	(1,170)	(9,192)
Weighted average of shares outstanding in the period (pieces)	24,290,843	24,290,843
EPS (HUF 1,010 face value)	HUF (48)	HUF (378)

The Group's earnings per share (calculated from comprehensive income) based on consolidated information for 31 December 2010 and 2009 are as follows:

	2010	2009
Comprehensive income/(loss), IFRS (million HUF)	(1,146)	(9,162)
Weighted average of shares outstanding in the period (pieces)	24,290,843	24,290,843
EPS (HUF 1,010 face value)	HUF (47)	HUF (377)

The average number of ordinary shares was determined based on the weighted mathematical average method. Employee shares were also considered in the calculation as employees are also entitled to dividends.

Diluted EPS is the same as basic EPS as the Company has no diluting instruments or purchase options.

Capital management

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the years 2010 and 2009.

The Group monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. Three different strategies are followed based on the level of Net Gearing. In the three various scenarios, Risk Management focuses on the followings:

- High Gearing situation is declared when the Net Gearing ratio will exceed 40% for any of the next consecutive four business quarters according to actual 12 month rolling forecast. In a high gearing situation, the prime objective of risk management is to reduce the probability of breaching debt covenants, where a breach would seriously impair the company's ability to fund its operations.
- Moderate Gearing situation is triggered when the Net Gearing ratio is between 20% and 40%. In Moderate Gearing situation, risk management aims to enhance the commitment in maintenance of investment grade credit rating. Having public investment grade credit rating ensures significant financial flexibility as capital market sources are also available at reasonable cost level.
- Low Gearing status occurs if the Net Gearing ration is below 20%. In this status, the focus of risk management shall be directed more toward guarding of shareholder value by maintaining discipline in CAPEX spending, ensuring risk-aware project selection.

	31 December 2010	31 December 2009
	HUF million	HUF million
Long-term debt, net of current portion	15,191	11,632

31 December 2010

Financial risk management

Foreign exchange and commodity price risks

The prices of the most important raw materials and those of olefin and polymer products produced by TVK Plc. fluctuate according to international market rates. Sales are significantly affected by the EUR/HUF exchange rate, while purchases are primarily USD based. In 2010 TVK Plc. did not have any forward or option contract nor had other derivatives to hedge FX risks. The loan granted to the Company is denominated in EUR in order to reduce exchange rate risks.

Sensitivity analysis for key exposures

In line with the international benchmark, Group Risk Management prepares sensitivity analysis. According to the Financial Risk Management Model, the key sensitivities are the following:

Effect on profit from operations	2010 HUF billion	2009 HUF billion
Petrochemical		
Brent crude oil price (change by +/- 5 USD/bbl; with fixed crack spreads and petrochemical margin)	- / +5.0	- / + 3.0
Integrated petrochemical margin (change by +/- 10 EUR/t)	+ / - 2.0	+ / - 2.0
Exchange rates (change by +/- 10 HUF/USD; with fixed crack spreads)	- / + 10.0	- / + 6.4
Exchange rates (change by +/- 10 HUF/EUR; with fixed crack spreads / targeted petrochemical margin)	+ / - 9.8	+ / - 10.8

Credit risk

Credit risk arises from the possibility that customers may not be able to settle their liabilities to the Company within the normal terms of trade. Credit risk arises from the risk of late payment by another party. In order to mitigate these risks, the Company carefully assesses each debtor and the debtor's ability to repay its debt on a regular basis. The company covers a significant part of trade receivables by credit insurance. Management is of the opinion that the maximum credit risks approximate the carrying amounts of the respective assets.

Interest rate risk management

As a chemical company, TVK has limited interest rate exposure.

As of 31 December 2010 and 2009, 100% of the Company's debt was at variable rates respectively.

As of 31 December 2010 and 2009, there was no open interest rate swap transaction.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

Liquidity risk

The Company is to maintain sufficient cash and cash equivalents or have available funding through an adequate amount of committed credit facilities to cover the liquidity risk in accordance with its financing strategy. The amount of undrawn facilities as of 31 December 2010 consists the followings:

	2010 HUF million	2009 HUF million
Short - term facilities available		
- bank	3,000	3,000
- majority stakeholder	24,420	17,615
Total loan facilities available	27,420	20,615

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

28. Commitments and contingency liabilities

APEH revision

In 2008, the Hungarian Tax and Financial Control Administration (APEH) conducted a full scope tax audit at the Company with respect to the year 2004 to 2005. The result of the tax audit was tax difference of HUF 435.4 million, which generated HUF 153.4 million tax penalty and HUF 66.7 million default surcharge. The total amount of penalties were recognized in January, 2009.

In 2009, the Company made a statement of claim to Metropolitan Court for judicial review of APEH's adjudgement. This statement was refused. The Company made a revisionary petition to Supreme Court.

The Supreme Court, from the disposals of absolute judgement, which were impugned by a revisionary petition, left in force in case of impairment of strategic inventories, redemption of severance payment and purchase price of sport facilities, but overruled in case of accounting of research and development costs. The Supreme Court instructed the Metropolitan Court to start a new procedure to re-calculate the default surcharge and the tax penalty. Based on the judgement, the Company recorded, which was left in force, and their estimated legal consequences (HUF 245,957 thousand) in its financial statements.

Capital and contractual commitments

The total value of capital commitments as of 31 December 2010 is HUF 412 million, which is fully attributable to TVK Plc.

Gas Purchase Obligation, Take or Pay Contract

The TVK Erőmű Kft. has concluded long-term gas purchase contract with EON Zrt. in order for continuous operation of equipments in the power plant. As of 31 December 2010, 653 million cubic meters of natural gas will be purchased during the period ending 2018 based on this contract. (from which 555 mcm under take-or-pay commitment calculated with a contractual average price)

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

Environmental protection

In 1996, before the privatisation of TVK Plc., an environmental audit of the Company had been carried out. Based on the findings of the audit, the restoration of the contaminated soil in the area of the Olefin plant began. The restoration on the area of the Paint Factory continued. The restoration of contaminated soil and water in other areas started in 1999, for which the Company contracted external consultants.

Based on the findings of this environmental audit, the Company recorded a provision for the estimated total environmental expenses to clean up existing pollution in 1996. As a full-scale assessment of the Company's potential environmental obligation is still outstanding, the amount of provision has been updated every year based on the results of the original study, the actual cleanup work performed and on management estimate.

The management of the company regularly assessed the measures and/or investments necessary in order to meet new Hungarian environmental requirements issued based on applicable EU directives.

In connection with this, an assessment of the underground pollution of the areas under decontamination began in the second half of 2002. Further to the findings of an environmental review carried out by an external consultant, HUF 2,101 million additional environmental provisions were created for expected extra restoration costs in 2002. The amount of provisions covers only those expenses that could be assessed and properly quantified at the time of reporting.

In 2003 the Company continued the survey of the underground pollution in order to get sufficient information about extension of environmental pollution and determine the most applicable technology for environmental restoration. The surveys found extensive underground pollution caused in the past. The Company submitted the summary report on the environmental survey completed at the end of 2003 to the North-Hungary Area Environment Authority (ÉMIKÖTEVIFE) by the required deadline in 2004.

The environmental authority requested further additions to the closing document. All the requested additions were prepared by TVK Plc. and have been submitted to the authority. Based on the documentation submitted, the North-Hungary Authority for the Environment, Nature and Water issued a note to TVK Plc. to prepare and submit a technical action plan by 30 September 2005.

The submitted Technical Intervention Action Plan has been prepared in accordance with relevant legislation in force and contains, in a scheduled manner, all the strategic measures and actions to be taken in the short and middle-term to achieve standard management of environmental responsibilities and to ensure compliance with environmental regulations with respect to the entire area of the TVK-TIFO industrial site. The Company manages liabilities and commitments related to past operations as part of an integrated project in co-operation with MOL Plc. The joint liability was agreed to by both TVK Plc. and MOL Plc. in their Co-operation Agreement signed in July 2006.

In its decision dated in December 2006 in relation to the complex Technical Intervention Plan, the Authority issued a decontamination order to both TVK and MOL with respect to the entire area of the TVK-TIFO industrial site. The decision approved the companies' short and middle-term action plan that aims to manage decontamination commitments on a risk and exposure basis while focusing on the continuous optimisation of environmental expenses and on decontamination solutions. As a major milestone, the Company has drawn a complete pollution risk map in 2009. The map will be used to re-define mid-term environmental goals and to prioritise their implementation.

The TVK-TIFO site's exploration and establishment of facts and its complementary information were prepared and submitted to ÉMIKÖTEVIFE by BGT Hungária Kft. in 2009. On the basis of these documents, the Authority prescribed the continuation of the exploration and the actual technical tasks of restoration with joint responsibility. The filing deadline of the exploration's closing documents is on December, 2012.

Within the TVK Plc's site, work is carried out to avoid further pollution on the southern part of the plant and the Company is making significant efforts to gauge the extent of the pollution as well as to identify and map the possible movement of the pollutants.

Notes to the consolidated financial statements prepared in accordance with International Financial Reporting Standards

31 December 2010

In 2010 and in 2009 HUF 130 million and HUF 185 million was spent on this action. As result of the complexity and the extent of the polluted areas, the Company initiated along this project also the common risk based concept strategy approach of recognizing environmental liability at TVK-TIFO plant participating by contracted external consultants.

In line with strategic environmental planning, the highest priorities at the TVK-TIFO industrial site are to protect human ecological receptors and to minimise environmental exposures (i.e. to identify and prevent both horizontal and vertical spread of pollution).

In order to gauge the deep pollutant towards the south-east of the Company's premises, the boundaries of the polluted area (both vertically and horizontally) were identified with a so called "pollutant dynamism monitoring system". Sampling and analysis already in progress need to be finalised in order to understand the pollutant's movement and dynamics.

Pollution is unchanged or is receding at the Emergency storage facility area of the Olefin container park.

The results of risk assessment reviews first started in 2006 have already limited the number of risks. Health hazards reviews of farmland in 2006 and 2007 found that crops produced in farmland at the eastern boundary of the TVK-TIFO site as reviewed in phase 1 and phase 2, did not represent over-the-limit health hazard for breeding stock or for humans.

We made a quantitative risk assessment in 2008 whose instantaneous findings showed that no agricultural, human exposure and ecological risks are expected to turn up that could be attributed to a contaminated subsoil under the industrial complex. Given that the information creating the input data for risk analyses need continuous updating, we added biological monitoring to our chemical analytical testing and monitoring programme in 2009 in order to explore any quantity of soil gas, which has a significant impact on human health and long-term impact on living organisms.

During 2009, the Company continued the mapping of the resources, geological structure of the site and the water streams and started to integrate them into the hydrodynamic transport model. On the basis of surveys, the original extension of environmental pollution was determined. By reason of joint responsibility, the extent of liability was revised. Henceforth, the costs of implementing of technical intervention will be divided between TVK Plc. and MOL Plc. in a 50-50 % ratio. As a consequence of this, provision was released in the amount of HUF 500 million in 2009.

TVK Plc. and MOL Plc., involving outsider specialists, set up a research project, which successfully applied for the tender „ For a Liveable Environment” invited by the National Technological Research Agency. The objective of the research programme is to prevent the transport of contaminants in the 16-32 m deep water-bearing zone and to study the methods of the reduction of their concentration.

The Company recognized – in consideration of the above-mentioned risks - environmental provision based on the currently available quantifiable future expenses in the amount of HUF 2,030 million as of 31 December 2010 (2009: HUF 1,971 million).

Beyond the provision recognized in the Balance Sheet, there are further contingent environmental liabilities whose amount may exceed HUF 4 billion. However, the probability of having these tasks completed is less than 50% due to the fact that there is no legal obligation to carry them out and that their exact technical content is uncertain.

31 December 2010

30. Share-based payment plans

General Incentive Schemes for management

The incentive scheme involves company and organizational level financial and operational targets, evaluation of the contribution to the strategic goals of the company and determined individual tasks in the System of Performance Management (TMR), and competencies. Expenses incurred by this scheme were HUF 118 million, and HUF 255 million in 2010 and 2009, respectively.

The liabilities related to incentive scheme as of 31 December 2010 and 2009 were as follows:

	31 December 2010	31 December 2009
	HUF million	HUF million
Short term incentive	256	252
	256	252

Share-option incentive from 2006

The incentive system based on stock options and launched in 2006 ensures the interest of the management of the MOL Group in the long-term increase of MOL stock price.

The incentive stock option is a material incentive disbursed in cash, calculated based on call options concerning MOL shares, with annual recurrence, with the following characteristics:

- covers a 5-year period starting annually, where periods split into
 - o a 3-year waiting period and a 2-year redemption period in case of managers staying in the previous system for 2009,
 - o a 2-year waiting period and a 3-year redemption period in case of managers choosing the new system already for Y2009, and it is valid for all of the entitled managers from Y2010.
- its rate is defined by the quantity of units specified by MOL job category
- the value of the units is set annually (in each year since the initiation of the scheme, 1 unit equals to 100 MOL shares).

According to the new system it is not possible to redeem the share option until the end of the second year (waiting period); the redemption period lasts from 1 January of the 3rd year until 31 December of the 5th year.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

The incentive is paid in the redemption period according to the declaration of redemption. The paid amount of the incentive is determined as the product of the defined number and price increase (difference between the redemption price and the initial price) of shares.

Details of the share option rights granted during the year are as follows:

	Number of shares					Total
	2010 share	2009 share	2008 share	2007 share	2006 share	
Outstanding at the beginning of 2006	0	0	0	0	0	0
Granted during the year					13,000	13,000
Forfeited during the year						0
Outstanding at the end of 2006	0	0	0	0	13,000	13,000
Granted during the year				14,939		14,939
Forfeited during the year				(1,512)	(583)	(2,095)
Outstanding at the end of 2007	0	0	0	13,427	12,417	25,844
Granted during the year			15,000			15,000
Forfeited during the year						0
Outstanding at the end of 2008	0	0	15,000	13,427	12,417	40,844
Granted during the year	0	14,500				14,500
Forfeited during the year			(600)			(600)
Outstanding at the end of 2009	0	14,500	14,400	13,427	12,417	54,744
Granted during the year	7,500					7,500
Exercised during the year					(12,417)	(12,417)
Outstanding at the end of 2010	7,500	14,500	14,400	13,427	0	49,827

As required by IFRS 2, this share-based compensation is accounted for as cash-settled payments, expensing the fair value of the benefit as determined at vesting date during the vesting period. Expense incurred by this scheme was HUF 93 million, and HUF 180 million in 2010 and 2009, respectively, recorded as personnel-type expenses with a corresponding increase in Trade and other payables.

Liabilities (without payroll related contributions) in respect of the share-based payment plans amounted to HUF 224 million as at 31 December 2010 (31 December 2009: HUF 161 million), recorded in Trade and other payables.

**Notes to the consolidated financial statements prepared
in accordance with International Financial Reporting Standards**

31 December 2010

Fair value as of the balance sheet date was calculated using the binomial option pricing model. The inputs to the model were as follows:

	2010	2009 (2 years waiting period)	2009 (3 years waiting period)	2008	2007
Weighted average exercise price *	58.69	41.88	41.88	104.82	21,146
Weighted average share price *	74.9	74.9	74.9	74.9	20,870.3
Expected volatility based on historical data	44.79 %	49.06 %	49.06 %	42.96 %	36.15 %
Expected dividend yield	1.26 %	1.26 %	1.26 %	1.26 %	1.26 %
Expected life (years)	4.0	3.0	3.0	2.0	1.0
Risk free interest rate	1.46 %	1.05 %	1.05 %	0.86%	6.48 %
Weighted average fair value of the options	31.7	38.2	37.8	10.7	3,287.2

* The units of measurement of values are EUR/share in 2010, 2009 and 2008, HUF/share in 2007.

Key management compensation

	2010 HUF million	2009 HUF million
Salaries and other short-term employee benefits	201	223
Termination benefits	-	-
Post-employment benefits	-	-
Other long-term benefits	-	-
Share-based payment	69	129
Honoraria	126	131
